Projects

PBH E-Commerce Project

Built using React, Node, Express and MongoDB

An E-Commerce platform for my family footwear business. This fully functional web application has User Authentication, Cart functionality, Admin Portal, Payment Gateway, Product Search and Reviews.

Live Demo - https://punjabboothouse.herokuapp.com

CryptoNow

Built using React, Redux Toolkit & Rapid API

A one stop hub for all things Crypto. Get latest stats, prices and news on all the popular cryptocurrencies and markets.

Live Demo - https://cryptonow.vercel.app

Portfolio Project

Built using HTML, CSS, JQuery and Bootstrap

In this fully responsive, accessible & SEO friendly portfolio along with Bootstrap I used various frontend concepts like CSS grid, Flexbox, CSS animations, gradients and more.

Live Demo - https://gurveen.netlify.app

Burger Builder

Built using React, Redux & Firebase

A fully functioning Burger Builder application to build, customize, review and place your order. Armed with features like User Sign-in, Orders Summary, Dynamic form generation and validation etc.
